

Thinking about getting an Easter bunny?

Keeping a rabbit is more complicated than you probably thought – and a lot more rewarding, too.

Most rabbits bought on impulse die early as a result of their owners' ignorance. Others grow into turbulent adolescence and are turned out into a hostile world. Still others linger in confining hutches, sad and neglected.

If you are considering a commitment to responsible rabbit ownership, please call us. Hundreds of rabbits in foster homes await adoption by the right people. We can supply you with information and support to promote a long, healthy, fun relationship between you and your pet.
